How to Download & Use CamScanner on iPhone

Step 1: Download & Install CamScanner

First, open the App Store on your iPhone. In the search bar, type CamScanner and tap the get button. Once installed, open the app to start using it.

Step 2: Setting Up Permissions

When you open CamScanner for the first time, it will ask for camera and storage access. Tap Allow so you can scan do save them easily. You can either sign up for a free account or continue as a guest.

Step 3: How to Scan a Document

To scan a document, tap the camera icon. Place your document on a flat surface and take a picture. CamScanner will automatically detect the edges and adjust the quality. You can also manually crop or rotate if needed.

Step 4: Editing & Enhancing the Scan

After scanning, you can edit the document by adjusting brightness, applying filters, or improving clarity. This makes sure your scanned documents look professional and easy to read.

Step 5: Saving & Sharing Scans

Once you're happy with your scan, tap Save and choose PDF or JPG format. You can then share it via email, WhatsApp, Google Drive, or other apps.
